

Graphics and signage for **BIG** ideas

/E.ON

WE PRINTED AND INSTALLED GRAPHICS THROUGHOUT E.ON'S OFFICES ACROSS THE UK USING A VARIETY OF MEDIA AND PRINTING METHODS

E.ON have offices across the UK, and as part of their refurbishment programme, required a consistent brand message and staff engagement theme.

After considering the look and feel that they wished to create, we recommended printing onto large scale vinyls and fabrics to be installed on-site over the six chosen locations. We also produced cut acrylic lettering in varying sizes and depths that was wall mounted to create a tactile surface of messages.

Cut acrylic logo in brand colours with a halo lit LED lighting affixed to wall.

HELLO

We have around twenty years experience of printing graphics and signage for installation, and it is this knowledge and expertise that enables us to deliver the quality of service we have become renowned for across the UK.

Adrian Rushton
General Manager

Much of the installation process was carried out overnight and weekends so as not to disrupt the E.ON staff, however some installation was delivered before the building was opened which required us to work closely alongside construction workers and building contractors.

/VINYL

Working with a leading creative agency in Nottinghamshire we printed and installed vinyl graphics throughout fourteen of E.ON's offices in the UK.

Alongside building contractors and construction teams, we helped to deliver the wow factor to E.ON's newly built offices which overlook Nottingham's city skyline.

We'll sort things

have a problem

We're making
things simple for
our customers

E.ON used a laminated vinyl wall covering to communicate a series of motivational messages in staff areas.

TIPS FROM THE TEAM

We installed the vinyl graphics while the building was still under construction, so we worked alongside construction teams and building contractors to deliver the completed job.

Steve Robinson
Installations Manager

The anti-scuff laminated vinyl is a hardwearing material able to withstand light bumps and knocks.

TIPS FROM THE TEAM

There is a wide choice of vinyl finishes available including matt, gloss, satin and textured. E.ON chose a satin vinyl with an anti-scuff laminate to protect it against everyday scuffs and bumps.

Dave Lister
Sales and Marketing Manager

Vinyl wall covering solutions are ideal for frequently used communal areas.

Printed dry-wipe notice boards affixed to walls to provide a bespoke communications display.

Vinyl wallpaper with a custom design applied directly to the office walls, with an anti-scuff laminate to protect it from bumps and scrapes.

/CUT VINYL

Vinyl can also be cut to shape to create messages and wayfinding that is more sympathetic to the surroundings.

Vinyl covered lift doors

Vinyl covered lift doors

Vinyl covered lift doors

Vinyl covered lift doors

TIPS FROM THE TEAM

Lift doors are a great area for placing graphics with a message because staff and visitors will be drawn to looking at them while they are waiting for the lift to arrive.

/FABRIC

FabriGrab™ is a versatile system that is applied to a wall using a thin frame. The fabric sits only a few millimetres away from the wall to create a bright, smooth finish. It is ideal for walls that are damaged or uneven. The low-profile of FabriGrab™ means it can easily be fitted around sockets and switches to give an appearance of wallpaper without any joins, and can be updated without the mess of traditional wallpapers.

Graphics and signage for BIG ideas

Floor to ceiling graphics can be covered using **FabriGrab™**. Its slim profile means it sits over the existing wall without any damage to the surface behind.

FabriGrab™ can be fitted around doors, windows, sockets and switches just like a wallpaper. It is clean, quick and easy to update when required.

/ACRYLIC

We love cut acrylic as it can produce some beautiful effects. This white on white wall with different thicknesses of acrylic letters was mixed with white gloss adhesive vinyl letters. The result was fabulous, with real depth, creating some interesting shadows next to a large window.

Cut acrylic lettering in a contrasting brand red and a subtle white on white.

TIPS FROM THE TEAM

Acrylic comes in thousands of colours, thicknesses and finishes. Thus, the possibilities are huge. We can also cut and bend acrylics to create some magnificent effects.

Dave Lister
Sales and Marketing Manager

TIPS FROM THE TEAM

It's a good idea to think about where your acrylics will be applied because lighting and shadows can create a stunning display beyond the graphics themselves.

Steve Robinson
Installations Manager

Different thicknesses of acrylic alongside vinyl letting to create a fabulous visual effect.
