

HELLO

We have around twenty years experience of printing graphics and signage for installation, and it is this knowledge and expertise that enables us to deliver the quality of service we have become renowned for across the UK.

Adrian Rushton
General Manager

/SPACE.NK

AS A TRUSTED SUPPLIER TO SPACE.NK, WE PRINTED AND INSTALLED A SUITE OF GRAPHICS AT THEIR FLAGSHIP STORE NEXT DOOR TO HARRODS IN CENTRAL LONDON.

Space.NK were looking at using the venue to become their PR location for all new product launches, PR events and presentations.

The large open space was a great canvas that suited our **FabriFrame™** solutions. We created the end walls using our **FabriGrab™** profile which were used as giant seamless event backdrops and along the walls we mounted brand-colour matched, powder coated **FabriFrame™** units which offered a greater flexibility for regular change of fabric images by the instore team. The Dye sublimated printed fabrics have extremely vibrant colours which lend themselves to cosmetics images.

We also supplied specialist printed floor vinyls cut to shape with anti-slip laminate which can be used for short term events which don't leave any residue.

Our team of professional fitters installed the frames and fabrics prior to the launch which is now into its third PR event. We will produce and install all the new fabrics and branding for all future events. With the framework now in place, it reduces the clients costs for installation on changeover of events making it a very adaptable space.

/FABRIC

FabriFrame™ is a revolutionary fabric tension system which is so versatile the creative possibilities are huge.

It can be mounted onto walls, doors or ceilings with a fabric graphic applied to the face, or be a free standing unit or partition wall, with a single or even a double facing fabric graphic.

FabriFrame™ units offer a greater flexibility for regular change of fabric images by the Space.NK team. We simply send them a new one in the post.

The dye sublimated printed fabrics have extremely vibrant colours which lend themselves to cosmetics images.

TIPS FROM THE TEAM

Replaceable fabric graphics are great for retail units because they are so easily updated. Whether it's a new product launch or a sale event, the result looks vibrant and professional.

Duncan Thompson
New Business Manager

The basement area used FabriGrab™ along the back walls for a vibrant, seamless finish.

FabriGrab™ can be fitted up against your skirting board and around sockets and switches too for a seamless finish.

The **FabriFrame™** system uses dye sublimation printing which creates rich, vibrant colours.

You can change **FabriFrame™** graphics as often as you like and you can store the used ones for another occasion, simply fold them up and put them somewhere safe and dry.

TIPS FROM THE TEAM

We installed this project in the evenings to eliminate any disruption to Space.NK's customers. We can also install over a weekend if it is required.

Steve Robinson
Installations Manager

FabriFrame™ units can be wall mounted, ceiling mounted or free-standing. They can even be backlit or used with acoustic padding to reduce echo in large rooms.
