Full Wall

Full coverage acoustics from skirting boards to ceilings, around window, doors and sockets.

Wall Art

Make a statement with selected areas of acoustic products in assorted colours, sizes and shapes.

Ceiling

Suspended panels lower the ceiling and reduce echo. Printed, engraved, shaped and hung at angles to suit.

Hanging

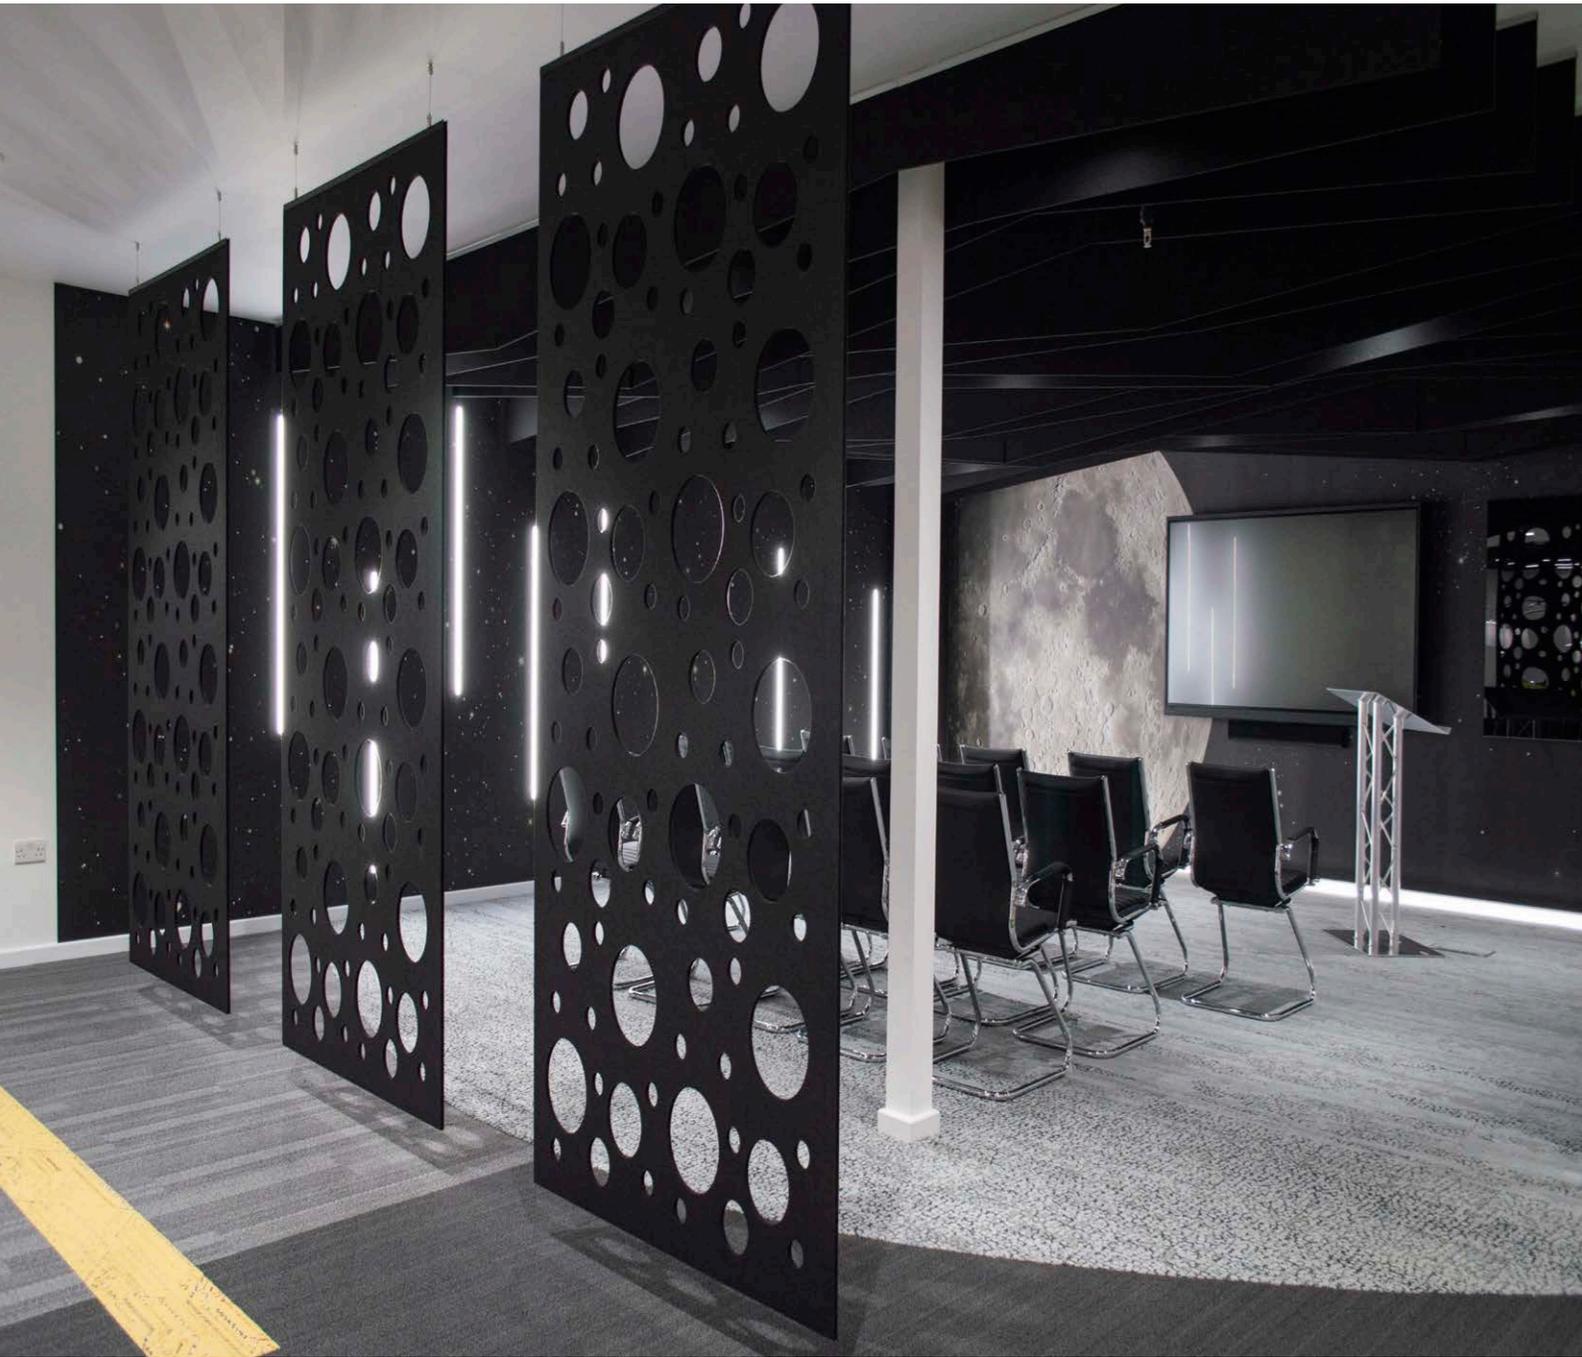

Vertically hanging panels to create a screen or baffles. Shaped, printed and cut to your bespoke design.

Freestanding

Divide the room and conquer unwanted sound bounce with acoustic partitions made to size.

CASCADE

DIVIDE AND CONQUER THE ECHO

Open plan environments never need to feel overwhelming as we bring you our most stylish and forward thinking solution to create privacy. Autex Cascade™, just like its name suggests, is a collection of acoustic hanging screens that simply fall from the ceiling in unique patterns designed with your privacy in mind.

Choose from 16 colours:

Features and benefits:

- Delivers excellent acoustic performance
- A wide range of designs and colours
- Lightweight and incredibly easy to handle
- Easily retrofitted to existing spaces
- Semi-permanent. Change your space as required
- Environmentally conscious product with recycled material content and no added chemical binders
- Cascade™ is low VOC, non-toxic, non-irritant and non-allergenic and contains no Red List chemicals
- Custom designs available
- Fixed or suspended acoustic partition system, improving your internal environment by lowering reverberation and background chatter
- Creates breakout zones in large open plan areas
- A feature element or a subtle backdrop
- Creates the feel of privacy in open-plan areas
- Easily added in acoustic absorption for reverberant spaces.

COVE

DESK SCREENS

Autex Cove™ is a user-friendly and effective privacy screen. This lightweight, solid colour solution simply slides on and off standard desks and tables without the need for additional fixings. Cove not only creates on-demand privacy, but also absorbs reverberation – dampening background noise and promoting a focussed workspace.

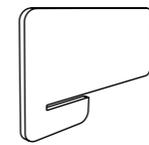

Cove can slot into any interior environment, with three designs and a range of contemporary colours – it can stand out or blend in as you need. Autex Cove is ideal for both the commercial and education sectors for its ability to easily transform shared workspaces into private desks. Because all spaces are different, we've given you creative freedom. If you have a particular custom design in mind, our design team are on hand to turn your vision into a reality.

Choose from 17 colours:

Features and benefits:

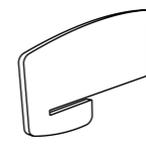

- Delivers excellent acoustic performance
- Solid colour and smooth finish, no capping required
- UV resistant qualities
- Easy to clean
- Customisable
- Easy to install and move
- Low VOC – beneficial for IEQ
- High recycled polyester content
- Highly durable, assuring long-term stability.

VERTIFACE

DYNAMIC DESIGNS

Autex Vertiface®, our most versatile product, is a flexible, textured fabric that comes in different finishes that allows endless design freedom and choice. As one of the most durable, hard-wearing and UV resistant textiles on the market today, Vertiface can be applied to furniture, add colour and texture to Autex Quietspace® Panel, or create an acoustic wall covering in Composition®.

Choose from 40 colours:

Features and benefits:

- Delivers excellent acoustic performance
- Design flexibility without the need for edging or capping, created with solid colour throughout
- Highly durable providing long-term stability and performance
- Customisable for limitless branding and design options through in-house cutting.

3D TILES

ADD DEPTH AND DETAIL

In packs of six, our lightweight and semi-rigid Autex 3D acoustic tiles are super easy to put up all while giving you the freedom to mix and match both colours and styles. With 15 colours in eight different designs, you can create a feature that reflects your own style and environment. But they don't only look good, they are high performing as well; specifically designed to reduce and control echo creating a more focused and productive space. Just like the rest of the interior acoustics range, durability, longevity and performance are assured

Choose from 15 colours:

Features and benefits:

- Seamless combination of acoustics and aesthetics
- Highly durable providing long term stability
- Lightweight and easy to install
- Available in a range of contemporary designs and colours to add life to outdated ceiling grids
- Resistant to fading
- Modular design for easy install and configuration
- Made from 100% polyester fibres without chemical binders and certified low VOC
- Safe, non-toxic and non-allergenic
- Manufactured under ISO 9001 and ISO 14001 accredited Quality and Environmental Systems
- Does not contain any Red List chemicals.

QUIETSPACE

A SOLUTION FOR ALL SURFACES

Quietspace has been engineered to absorb a minimum of 85% of the sound energy it meets. This means annoying and distracting noise no longer feels that way. Intentionally designed in three of the most common interior colours; black, grey and white, Autex Quietspace can easily blend into ceilings and walls to simply do its job. But if you would like to turn your acoustics into a design element without losing the performance, simply use the ultimate upgrade; and combine with Autex Vertiface®. Face your panels in any of our colours to create full feature walls or custom shapes and designs. Anything is possible. Available in 25mm, 50mm, 75mm and 100mm there's no acoustic challenge Quietspace Panel can't meet.

Choose from 3 colours:

Features and benefits:

- High performance acoustic panel for commercial interior sound control with a sophisticated appeal
- Refined acoustic surface for framed modular office partition panelling
- Direct fixed to ceilings
- Wallcovering with exceptional absorption of reverberated noise
- Functional acoustic wallcovering for retail and commercial interiors
- A decorative feature with custom cut options available.

COMPOSITION

GREAT FOR ALL PUBLIC SPACES

Autex Composition® is an acoustic wall covering available in a range of colours. Typically applied in vertical drops like wallpaper, Composition creates a surface that is pin and velcro receptive. Composition is a durable and flexible polyester wall covering that replaces the need to paint, and is easily maintained to look amazing for a long time. Composition is great for any working or learning space because it creates incredible environments by reducing and managing the reverberation in the room. And because not all spaces are the same, Composition can be cut to any shape, or printed to create something as unique as each one of us.

Choose from 40 colours:

Features and benefits:

- Delivers excellent acoustic performance
- Pinnable, hook-and-loop receptive surface
- Customisable for limitless branding and design options through in-house cutting
- Hard-wearing
- Minimise noise in interior environments
- A protective layer for plasterboard
- Alternative finishing to paint.

CUBE

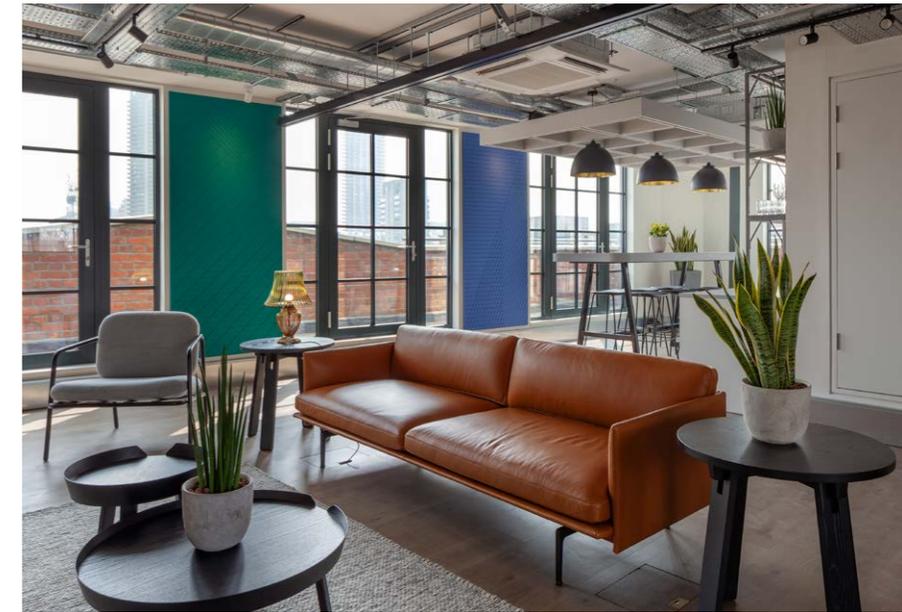

TRANSFORM YOUR WALLS

Cube™ is a lightweight but semi-rigid panel made from compressed polyester felt that has endless design flexibility. In standard panel sizes with options of 12mm or 24mm thicknesses, Cube works hard to reduce reverberation and control background chatter.

Cube can be cut, printed on or moulded with no need for edging or capping. It can be used in ceilings, as panels between workspaces or in bespoke installations with custom designs. And if that wasn't enough, just stick it straight to the wall with our Peel 'n' Stick backing options.

If you have your own ideas, our in-house design team are on hand to turn your vision into reality.

Choose from 17 colours:

Features and benefits:

- Delivers excellent acoustic performance
- Design flexibility without the need for edging or capping, created with solid colour throughout
- Highly durable providing long-term stability and performance
- Customisable for limitless branding and design options through in-house cutting.

LATTICE

HANGING PANELS

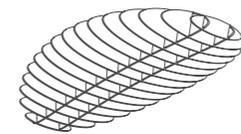

Autex Lattice is a master at controlling the echo of background chatter and reducing reverberated noise whilst adding a unique piece to any space. Lattice offers incredible performance by using fins. Because noise operates in different frequencies the various shapes of Lattice are designed to tune into and cut out the babble. Lattice is available in 3 ready to go styles but our design team can create bespoke fins and shapes for your challenge. Lattice is available in a wide range of colours. But Lattice doesn't only look good, it's high performing as well; specifically designed to reduce and control echo creating a more focused and productive space. Just like the rest of our range, durability, longevity and performance are assured, leaving nothing left but your creative license.

Choose from 17 colours:

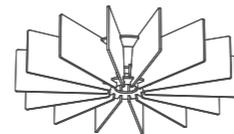

Features and benefits:

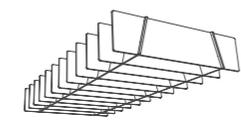

- Delivers excellent acoustic performance
- Available in three designs and 17 vibrant colours
- Adjustable system to target multiple frequencies
- Lightweight and easy to install
- Lattice is a product made from Autex Cube™ as the base material. Cube is 'Declare' certified to be Red List free.

SYMPHONY

UNLIMITED DESIGN OPTIONS

Autex Symphony® is typically applied in vertical drops like wallpaper, Symphony creates a pinnable surface with a sleek, flat finish unlike Composition®, which has more of a work-horse finish. Symphony offers a higher sense of luxury, but is essentially personal choice. Beyond all that, it creates focussed spaces by reducing and managing the echo in the room resulting in a more productive environment. And because not all spaces are the same we've given you creative freedom. We can cut to any shape and add any design, creating something as unique as each one of us. It's highly durable and takes everything you can throw at it giving you the assurance of longevity.

Choose from 40 colours:

Features and benefits:

- Create a more comfortable and personalised experience by tuning the acoustic effect
- Simply delivers excellent acoustic performance
- Pinnable receptive for use as noticeboards
- Impact resistant
- Customisable for limitless branding and design options through in-house cutting.

FRONTIER

SOUND SENSE FOR CEILINGS

Autex Frontier™ offers targeted sound absorption, endless configurations, and stress-free installation without compromising acoustic performance. Frontier is an innovative acoustic system designed for targeted sound absorption for today's ever-changing open-plan workspaces, retail, education and hospitality applications.

Frontier allows designers to mix and match colours and styles to create endless configurations. Whether specifying Fin or Raft styles, Frontier offers incredible acoustic performance that can be 'tuned' for the space.

Choose from 17 colours:

Features and benefits:

- Choose from 17 colours and nine styles, including Fins or Raft for a bold, dimensional statement
- Create a more comfortable and personalised experience by tuning the acoustic effect. Simply move the Fins or Rafts closer together or further apart
- Mount Fins or Rafts flush to the ceiling to 'blend in', fix them to rails or suspend them using extension rods
- Frontier can be configured to fit the space perfectly
- Hides ceiling services.

HORIZON

CUSTOM SHAPED CEILING PANELS

Autex Horizon™ allows shapes to appear floating from ceilings while increasing acoustic performance. With five geometric shapes, slick finished edges and clean hidden fixings, Horizon provides a premium looking feature for hospitality spaces, open plan offices, meeting rooms, education facilities and lobbies. Utilising our sophisticated channels, clips and suspension wires, Horizon can be installed on ceilings without the need for clear space, as minimal contact is made between the panel and the surface area; providing a floating aesthetic. For ceilings, Autex Horizon's adjustable system allows you to set the suspension height with ease giving you the ability to target multiple frequency levels within the chosen space.

Choose from 17 colours:

Features and benefits:

- Delivers excellent acoustic performance
- Can be subtle or a feature design for small or large spaces
- Low VOC – beneficial for IEQ
- UV stabilised and resistant to colour fade so it'll always look as good as the day it was installed
- Not made from fibreglass or mineral fibre and does not contain formaldehyde, crystalline silica or other carcinogens, common to traditional fibrous absorbers
- Cleanable and easily demountable
- Hides ceiling services
- Includes high recycled content and is recyclable at the end of its life
- Highly durable so you're assured of long-term stability and performance.

SCREEN

FLEXIBILITY ON EVERY LEVEL

Suono Screen™ can be made to any size to suit your space and can be printed with any colour or image. The versatile mounting system allows the screen to be hung on tensioned wires from the ceiling – like normal acoustic hanging panels – or be free-standing and portable. This is an excellent option for open-plan offices that demand a degree of flexibility. Create instant rooms and booths with Suono Screen.

Easily interchangeable graphics allow the system to be fully customisable and updateable, taking only a few minutes to switch the fabric for a complete new look.

Unlimited colours, printed with any design you like.

Features and benefits:

- Reduced sound bounce
- Softer acoustics
- Reduces echoing
- On-brand colour options
- Wide range of shapes and sizes
- Recycled textiles
- Recyclable frame
